Active Directory Certificate Services in Windows Server 2008

Training Type: Online Vendor: Skillsoft Duration: 2 hours

Description:

Windows Server 2008 introduces a new management service, the Active Directory Certificate Services (AD CS), which provides a new console snap-in that allows administrators to manage certificates authorities on Windows Server 2008. AD CS includes new Templates, the addition of new enrollment capabilities. All of these features are available in Windows Server 2008. Active Directory, Configuration, and the Windows Server 2008 Active Directory, Configuration certification, and counts as credit towards the following exams: Microsoft Certified IT Professional (MCITP): Enterprise Administrator, and the Microsoft Certified IT Professional (MCITP): Server Administrator certifications, since both MCITPs are certifications that require more than one exam. TargetAudience=The audience for this path includes administrators who are rolling out and supporting Windows Server 2008 in the enterprise. The audience also includes individuals seeking certification on Microsoft's new generation server platform.

Active Directory Objects in Windows Server 2008

Training Type: Online Vendor: Skillsoft Duration: 2 hours

Description:

Windows Server 2008 includes several new and improved Active Directory features. The most notable change is the renaming of Active Directory Services to Active Directory Domain Services. Further administration and security enhancements make Windows Server 2008 the most complete out of the box version to date. This course explores new account policy and fine-grain password policy features, along with improvements to common Active Directory administration, such as group membership, delegation, and importing data. Mapping to the following exams: Microsoft Certified IT Professional (MCITP): Enterprise Administrator, and the Microsoft Certified IT Professional (MCITP): Server Administrator certifications, since both MCITPs are certifications that require more than one exam. TargetAudience=The audience for this path includes administrators who are rolling out and supporting Windows Server 2008 in the enterprise. The audience also includes individuals seeking certification on Microsoft's new generation server platform.

Accessing Exchange Server 2007 Remotely

Training Type: Online **Vendor:** Skillsoft **Duration:** 1 hour 30 minutes

Description:

Email is now one of the most critical business applications that people use on a daily basis. Because of this, it necessary for many people to access their email whether they are at the office, home or traveling abroad. Traditionally, people could only access email remotely through a simplified web interface or by configuring a VPN to their corporate network. Now people can enjoy the full functionality of Outlook by using Outlook Web Access (OWA) or Outlook Anywhere. This course discusses accessing email remotely using solutions such as OWA, Outlook Anywhere, as well as remote email solutions using mobile devices. TargetAudience=Systems administrators, systems engineers, systems analysts, IT consultants, and support professionals with responsibility for planning, implementing, and maintaining Microsoft Exchange Server 2007; learners preparing for the MCTS and MCITP certification exams.
